## **HIGH POWER 980NM LASER DIODE**

These high power 980nm laser diodes are packaged in a 11-pin high heat-load (HHL) package. The integrated thermistor helps maintain the laser at a safe operating temperature when the laser is mounted to an active temperature-controlled mount. The monitor photodiode allows for constant-power mode operation, and the red aiming laser helps when integrating the laser.

The HHL package is designed to easily mount to a heatsink, and features an SMA connector to connect the detachable 200µm core optical-core fiber (NA 0.22).

RealLight lasers are known for their robust construction, and long operational life-times.
