IPG Photonics' PLD-10 Series fiber-coupled diode lasers provide up to 10 W of output power within 0.13 NA. PLD-10 diode options include 105 μm or 110 μm fiber core diameter, and center wavelength at 915 nm, 940 nm or 975 nm.

IPG's best-in-class diode technology offers an ideal combination of power, reliability and form factor. The diodes leverage our vast telecommunication industry experience and technology investment. We manufacture to rigorous telecom-grade standards in the world's largest high power diode fab. Each wafer is individually qualified, which sets IPG apart from alternative industrial pump products using short-lived diode bars and bar-stack technologies. PLD-10 diode lasers are preferred for fiber amplifier and laser pumping, material processing and direct diode applications.
