

Uncooled Mini-DIL 980nm Pump Laser Module LU9

Features:

- Operating temperature range from 0°C to +70°C (case)
- Up to 300mW kink-free power over full operating temperature range
- Polarization maintaining (PM) fiber
- Low power dissipation
- Laser chip and package design with submarine reliability
- Wavelength stabilized by fiber Bragg grating over entire operating range
- Center wavelength at 974, 976 and 980nm
- Telcordia GR-468-CORE compliant
- RoHS compliant 

Applications:

- EDFA or EDWA requiring low-to-medium optical power with low power consumption and small form-factor package

The Oclaro LU9 uncooled Mini-DIL 980nm pump laser module is the second generation uncooled pump module providing higher power for highly reliable amplification for metro, cross-connect or other single/multi-channel amplification applications. The LU9 uses a Mini-DIL package enabling low-cost and small form-factor. The G07 ridge-waveguide laser diode inside has been designed for uncooled operation at high temperature and power levels. Submarine qualification of the G07 chip ensures high reliability even at 270mW operating power, 70°C. External Fiber Bragg Grating (FBG) stabilization provides excellent wavelength and power stability over the entire temperature operating range.

RoHS Compliance

Oclaro is fully committed to environment protection and sustainable development and has set in place a comprehensive program for removing polluting and hazardous substances from all of its products. The relevant evidence of RoHS compliance is held as part of our controlled documentation for each of our compliant products. RoHS compliance parts are available to order, please refer to the ordering information section for further details.
