

SUPERIOR SENSITIVITY

Eblana Photonics EP1692-DM-B laser, available in the 1680 - 1730nm range, is designed to coincide with hydrocarbon absorption lines in the 1690nm region. Eblana's Discrete-Mode (DM) technology enables tunable single-mode operation with no mode-hops, at a competitive price.

Typical optical spectrum at 25° C

Output power as a function of bias current

Laser Safety

This is a Class 3R Laser Product as defined by International Standard IEC 60825-1, Edition 3. Invisible Laser radiation is emitted from the end of the fiber or connector. Avoid direct eye exposure to the beam. Laser safety labels are not attached to the module due to space limitations but instead are affixed to the outside of the shipping carton.
