## BUTTERFLY LASER DIODE

These multimode butterfly-packaged lasers deliver high power, narrow line width laser light due to the internal volume Bragg grating.

## RELIABLE PERFORMANCE IN A STANDARD LASER PACKAGE

These laser diodes are offered in an industry standard 14-pin butterfly package with a 105µm multi-mode fiber pigtail, terminated with an FC/PC connector.

The laser package integrates a thermo-electric cooler with 10 kΩ thermistor, and an internal monitor photodiode.

The pinout is industry-standard Type-1 pinout. The package is electrically floating relative to ground, offering flexibility in mounting and control of the laser.
