KEY FEATURES:
- Exceptional wavelength stability < 0.015 nm
- Coherence length up to 2.0 m
- Output powers up to 500 mW
- Excellent beam quality and stability
- Temperature-stabilized
- Highly cost-efficient

*1 transversal multi mode  *2 Water cooler recommended  *3 Running the laser continuously at maximum output power

## General specifications

- **Warm-up time**: ready for use after 5 s, calibrated operation after 3 min
- **Drive mode**: active current control
- **Modulation modes**: constant adjustable power, analog & digital external modulation up to 1.5 MHz
- **Control modes**: power, temperature and modulation via USB, optional remote control available
- **CDRH classification**: 3b, 4 (for laser output > 500 mW)
- **Dimensions**: 63.5 × 31.0 × 32.5 mm (technical drawing available on our website)
- **Weight**: 94 g (laser head)
- **Operating temperature**: 0 °C to 45 °C (non-condensing)
- **Storage temperature**: -25 °C to 70 °C

* Modulation may decrease beam quality and stability.
The Lambda Beam laser head requires a laser controller to provide power and control all operating parameters. For scientific applications and prototyping we recommend using our PowerController. For industrial integration we also offer the highly compact PowerBox to be directly attached to the laser head or connected via a customized cable.

### Laser Controller

**Modulation input**
analog and digital 0 – 5 V DC

**Modulation**
up to 0.5 MHz

**Digital interface**
USB* (RS-232 optional)

**Further control inputs**
Interlock, key switch, modulation mode switch

**Cable length**
80 cm (default)

**Power consumption**
12 V DC, up to 2 A (depending on laser output power)

**AC adapter (included)**
100 – 240 V AC, 50 – 60 Hz

**Dimensions**
85.0 × 85.0 × 32.5 mm (technical drawing available on our website)

**Weight**
416 g

* Digital connection is not required for operation.

For more details, please see the PowerBox data sheet.

### Options and accessories

- Beam diameter correction
- Polarization > 10 000 : 1
- Opto-mechanical shutter
- Diode wavelength selection
- Water cooling base plate
- Remote control RC-1 for Power Controller
- RS-232 interface
- Fiber coupler*2

### PowerController

**Modulation input**
analog and digital 0 – 5 V DC

**Modulation**
up to 1.5 MHz

**Digital interface**
USB* (RS-232 optional)

**Further control inputs**
Interlock

**Power consumption**
12 – 36 V DC, up to 2 A (depending on laser output power)

**Dimensions**
39.0 × 31.0 × 32.5 mm (technical drawing available on our website)

**Weight**
69 g

* Digital connection is not required for operation.

* See separate data sheet for details.

### Ltune control software

All operating parameters can be monitored and controlled from a PC using the Ltune laser control software for Windows. Alternatively, the laser can easily be controlled from your own application software. Please refer to the user manual for a detailed description of the communication protocol.

**Typical Applications**

- Analytical Instrumentation
- Bio-Instrumentation
- Confocal Microscopy
- Holography
- Holography
- HeNe Replacement
- LIDAR
- Metrology
- Raman
- Speckle interferometry
- Photodynamic Therapy

**Typical power stability**
